

## Products and parts for deck construction

Technical spec. for **Pylex commercial 66** No. article 10720

The simplest and most efficient way to support a commercial shelter (or other type of installation) without needing to dig or pour concrete. No more tedious tasks! Easy installation: dig a 2 ft. hole using the screw, then screw it in the ground.

Its pulling-off force and side thrust, its metal structure and its 4 blades ensure solidity and durability. This modern technology can be used in all types of terrain and resists ground movements (freezing, thawing).

Supports loads up to 5,000 lb., 4,781 lb. of pull-off force and 1,641 lb. of side thrust

Baked powder coating finish (anticorrosion)

To be used with 5 ½ in x 5 ½ in square posts

Offers a simple leveling option and long term protection since the wooden post is above ground level

ITEM #10730

POIDS / WEIGHT : 10,60 Kg  
UTILISATION / USE : 6 X 6  
CAPACITÉ / CAPACITY : 5000 LBS
