These carbon steel trimmers have chrome over nickel plating. Knife edge and blunt tips options are available on most models. All shears shown will easily cut rubber, cord, and multiple layers of fabric. Ergonomic and large ring models have an extended bottom handle for additional comfort and cutting leverage. Made in USA.

NEW! SuperNonStick™ Shears --
Made with a New Specialized Industrial Release Coating -- providing superior non-stick characteristics -- no other shear comes close, adhesives and tapes clean or pull off easily. Shears are hot-forged, through-hardened carbon steel, providing durability and longer-lasting sharp edges. Large, comfortable handles fit all hand sizes. Shears are 10" bent trimmers, with offset handles -- great for cutting roofing materials (including Peel-and-Stick) and the 10" blades are ideal for long straight cuts. Made in USA.

</tr>
</tbody>
</table>

| DC65130*  | 7-1/8"         | 180.96 mm     | 0.33 lbs    | 149.69 g |
| DC65090   | 7-3/4"         | 196.85 mm     | 0.43 lbs    | 195.04 g |

This broad-blade shear is excellent for cutting thick industrial materials, providing high leverage cutting action with short, powerful, serrated blades. Ideal for cutting steel strapping and nylon cord. Chrome over nickel plating. Available option with soft-coated handles. Made in USA.

| DC65170   | One blade serrated to help prevent slippage during cutting * |
| DC6681    | Large ring, cushion grips -- increased comfort, better leverage * |
| DC6682    | Large ring, broad blade (for Kevlar®) |
| DC6685    | Utility shear, Blue cushion grips |

This style shear is one of our most widely used -- ideal for cutting many different materials including rubber, industrial fabric, light metals, and wire. Ergonomic and large ring (LR) models have and extended bottom handle for additional comfort and cutting leverage. Made in USA.

| DC65100*  | 8-5/8"         | 219.08 mm     | 0.42 lbs    | 190.51 g |
| DC65180   | One blade serrated |
| DC65010   | Knife edge     |
| DC65020   | Knife edge, Blunt tips * |
| DC65050   | Ball point     |

The following shears are designed specifically for hard-to-cut materials used in the composite industry, and the shears are made with a special hard industrial chrome plating, which enhances the high carbon steel surface (Rockwell hardness = 72). Handles include large ring for easier handling and cutting. Made in USA.

| DC66030   | 10"            | 254.00 mm     | 0.89 lbs    | 403.70 g |
| DC67900*  | 9"             | 228.60 mm     | 0.48 lbs    | 217.72 g |
| DC66682   | 8-5/8"         | 219.08 mm     | 0.53 lbs    | 240.40 g |

These carpet shears enable more precise hand trimming of carpet and other materials with pile with the offset handle. Hot drop forged chrome over nickel plated steel. Blue ergonomic cushion grip handles. Made in USA.

| DC66710   | 7-7/8"         | 200.03 mm     | 0.28 lbs    | 127.00 g |

BLADE OPTIONS

Blunt Tips
When safety is a concern, the tips of our shears can be blunted. The tips are rounded, removing the point, eliminating the possibility of injury or snagging or tearing material. Cutting efficiency at tip is maintained for “snipping.”

Extra Blunt Tips
Extra blunt tips are not just for safety! When added blade strength is required and cut length is critical, order the next shear size larger than needed and “XB” the blades for superior strength.

Fully Rounded Tips
Fully rounding the scissors removes approximately 1/4" of the cutting edge. This option can be helpful when there is a possibility that the worker might snip his or her fingers.

Knife Edge
Cutting edge of one blade is precision ground to a sharper angle for easier cutting. Excellent feature for cutting upholstery, carpet, heavy fabrics, etc.

Serrated Edge
Serrating or corrugating one or both blades prevents the slipping of wire, textiles, and other hard-to-cut materials. Available in Light, Medium, and Deep serration.

Curved Blades
 Provides extra clearance for, provides better access to, and prevents damage to material being cut.
