

The Complete Application

MULTI-BEAD APPLICATOR FOR INSTA STIK™ QUIK SET

With the Multi-Bead Applicator from Dow, jobs on large, open roof areas can be completed more quickly and easily. Let the Multi-Bead Applicator leverage your efforts without sacrificing any of the precision and detail of hand applications.

The Multi-Bead Applicator is the ideal complement to INSTA STIK™ Quik Set Commercial Roofing Adhesive, a one-component, moisture-cured polyurethane adhesive for attaching compatible roof insulation boards to roof decks and substrates.

Work Smarter and Faster

We've designed the Multi-Bead Applicator to provide a labor-saving method of applying beads of INSTA STIK Quik Set to roof decking in consistent patterns.

With the Multi-Bead Applicator, no job is too big – you can cover more area without adding more people to your roofing crew.

Puts You in Control of the Job

The Multi-Bead Applicator lets you cover more area in less time, delivering consistent applications of INSTA STIK™ Quik Set Commercial Roofing Adhesive.

As a result, you can enjoy the benefits of INSTA STIK Quik Set on major projects where hand application of the product is not efficient.

Durable Construction, Easily Adjustable

The Multi-Bead Applicator uses three tanks of INSTA STIK™ Quik Set Commercial Roofing Adhesive. The tanks are connected by hose to a central inlet manifold.

The Multi-Bead Applicator is rolled backward along the roof deck as four to eight beads of adhesive flow from the outlet tubes in a precise pattern that can be adjusted per roofing requirements. The Multi-Bead Applicator also features an ancillary manifold that can be used near the roof edge to add three interspaced beads to the pattern.

The Multi-Bead Applicator can be easily adjusted to give you the pattern you need. Just position the outlet tubes anywhere along the spreader bar to fit your needs. You can also position the front wheel in any of the pre-drilled holes so that it can be used in conjunction with any roof deck corrugation.

Key Features of the Multi-Bead Applicator

Capacity	• Three INSTA STIK™ Quik Set tanks
Stop-Restart Ability	• Use of tube end plugs allows for easy restarts
	• Can restart as much as one week after previous usage
Wheels	• Wide, low-pressure wheels ride over soft surfaces better
	• Wheel base is wide enough to span varied corrugation spacings
	• Center wheel is adjustable
Beads Applied	• Up to eight beads of INSTA STIK Quik Set
Balance	• Weight is evenly distributed so tanks remain secure on platform

For consistent application on larger jobs, stick with Dow.
