technology, utilizing polyurethane, epoxy and

parking repair project. BASF can help you select

MasterSeal deck coatings can be mixed and

and profitability of your parking structure.

A well maintained garage increases the life span

waterproof surfaces. The safer your customers feel

energy. BASF repair materials work to eliminate

maximize light resources without the use of extra

strengthening, but our light reflective coatings

have light reflective coatings with a high level of a

tripping hazard, and dark coatings create more reflective

surface. So our coatings enhance your customer's view of

your structure, the more they will feel safe. It's not just a

more beautiful garage, but a safer one that is a major

sale tool.

We and our techs check every

MasterSeal deck coatings are reentrant and a

material to make the new system work for you.

After the system is in place, BASF will

the parking membrane or any other surf

technologies, allowing for products, services

and materials to adjust to the variability of the

same solution to meet the demands of a

comprehensive portfolio under the Master Builders Solutions

brand encompasses concrete adhesives, cement additives,

chemical solutions for waterproofing, waterproofing

solutions, waterproof concrete repair and protection solutions,

performance-graft and performance foams.

Master Builders Solutions from BASF

The Master Builders Solutions brand brings all of BASF's expertise
together to create innovative solutions for new constructions,

maintenance, repair and renovation of structures. Master Builders Solutions

has built an extensive experience gained from more than a
century in the construction industry.

The know-how and experience of a global community of BASF

cost and profit experts from the core of Master Builders Solutions.

We combine the right elements from our portfolio to solve your

specific construction challenges. We collaborate across areas

of expertise and regions and draw on the experience gained from countless construction projects worldwide. We leverage
global BASF technologies, as well as our in-depth knowledge of building needs, to develop innovations that help make
you more successful and drive sustainable construction. The comprehensive portfolio under the Master Builders Solutions

brand encompasses concrete adhesives, cement additives,

chemical solutions for underground construction, waterproofing

solutions, waterproof concrete repair and protection solutions,

performance-graft and performance foams.

Master Builders Solutions products from BASF for the Construction Industry:

MaterialSolutions

MasterDeck®

Solutions for an entrant concrete

MasterBond®

Solutions for concrete strengthening

MasterCem®

Solutions for manufactured concrete

MasterSilicon®

Solutions for cement manufacture

MasterFinish®

Solutions for concrete repair

MasterFiber®

Solutions for reinforcement

MasterFilter®

Solutions for precision grounding

MasterGlenium®

Solutions for high-performance concrete

MasterFlex®

Solutions for concrete injection

MasterFusion®

Solutions for concrete curing

MasterSil®

Solutions for enhanced durability

MasterMix®

Solutions for self-consolidating concrete

MasterFlex®

Solutions for water leak concrete

MasterUcrete®

Solutions for industrial and commercial floors

MasterProtect®

Solutions for concrete protection

MasterLean®

Solutions for concrete foundations

MasterFlow®

Solutions for underground construction

MasterArco®

Solutions for waterproothing and sealing

MasterSet®

Solutions for restoration control

MasterSuru®

Solutions for waterproothing and sealing

MasterTop®

Solutions for restoration control

MasterProtect®

Solutions for concrete Protection

MasterProtect®

Solutions for underground construction

MasterTape®

Solutions for restoration control

MasterSuru®

Solutions for waterproothing and sealing

MasterTop®

Solutions for industrial and commercial floors

MasterFilter®

Solutions for precision grounding

MasterFiber®

Solutions for reinforcement concrete

MasterGlenium®

Solutions for high-performance concrete

MasterFlex®

Solutions for concrete injection

MasterFusion®

Solutions for concrete curing

MasterSilicon®

Solutions for cement manufacture

MasterFinish®

Solutions for concrete repair

MasterFilter®

Solutions for precision grounding

MasterGlenium®

Solutions for high-performance concrete

MasterFusion®

Solutions for concrete curing

MasterSilicon®

Solutions for cement manufacture
Parking Structures

Knowledge, expertise and product solutions to protect and improve parking structures.

The Importance of Parking
Parking structures are invaluable assets to facility owners and communities. They are a critical component of urban development. Parking structures are a key part of the overall urban environment and play a role in shaping urban development. They are a vital part of city life and are responsible for providing parking for millions of vehicles daily.

When the Elements Prevail
Parking structures are vulnerable to the elements. Structures are subject to a wide range of environmental conditions. Water, sunlight, heat, and cold can all have adverse effects on parking structures. These conditions can lead to more destructive damage. Each parking structure has its own set of difficult environmental, structural and design conditions and challenges. These conditions can lead to more destructive damage. Each parking structure has its own set of difficult environmental, structural and design conditions and challenges.

The Devastation of Corrosion
Damage to parking structures can result in lost revenue and increased risk of injury or harm to people using the structure. Mold, mildew, algae, bacteria, and fungi can all have adverse effects on parking structures. These conditions can lead to more destructive damage. Each parking structure has its own set of difficult environmental, structural and design conditions and challenges.

Develop an Effective Repair Strategy
BASF can provide the knowledge and tools you need to repair your parking structures by selecting the right technologies and suitable structural and chemical solutions. Our team of experts is dedicated to helping you understand the root causes of deterioration and correcting the root cause.

Connecting Knowledge and Expertise
BASF Parking offers technical support from engineers, project managers and field representatives who have the knowledge and experience to help you with your parking structure restoration projects. They can help you select the most appropriate products and technologies to ensure the long-term success of your project.

Developing and implementing a comprehensive repair strategy for parking structures requires the right technology and expertise. BASF can help you develop a comprehensive repair strategy that will address the root causes of deterioration and prevent future problems.

Repair and Protect
BASF Parking offers a comprehensive portfolio of products and services to help you repair and protect your parking structures. Our portfolio includes:

- **Deck Membranes and Design**
  - Protect from harsh environments
  - Ensure durability
  - Design for aesthetic and functionality

- **Water Repellents**
  - Cataphoretic and self-leveling membranes
  - Protect from disinfectants
  - Maintain original appearance

- **Concrete Repair**
  - PVC, polymer and lime mortars
  - Protect from chemical and biological damage

- **Corrosion Mitigation**
  - Corrosion inhibitors
  - Prevent rust and spalling

- **Concrete Strengthening**
  - Mortars, primers and bonding agents
  - Increase structural integrity and safety

- **Joint Sealants**
  - Bridge cracks and reduce water ingress
  - Customize for specific applications

- **Deck Membranes and Overlays**
  - Seal and protect from moisture and corrosion
  - Designed for quick turnaround and durability

- **Surface Coatings**
  - Protective and reflective coatings
  - Crack bridging lowers need for maintenance

- **Applicator Training**
  - Improve the quality and profitability of repairs
  - Hands-on application instruction on an actual parking structure

The leading industry training program for professionals in the parking industry. Countless "firsts" and innovations have been developed through hands-on application instructions on actual parking structures. BASF parking repair training is one of the most advanced and comprehensive programs available. The program is designed to help you develop the skills and knowledge you need to protect and improve your parking structures.

Leading Industry Training Program
BASF Parking is a leading industry training program in the leading industry training programs, providing the latest and most comprehensive training. Our training program is designed to help you develop the skills and knowledge you need to protect and improve your parking structures.
