

Safety Hatch Bracket Alternates

Counter Flashing Mount

Bolting to counter flashing: Remove disk plate nut and washer put bolt through pre drilled holes reinstall as per drawing tighten bolt to get disk plate tight to roof membrane then tighten the two nuts to the hatch counter flashing.

Base Flashing Mount

Locate brackets as shown on drawings. Set bracket so the sq. tubing is as low as it can be on the counter flashing, if the hatch door hits the bracket it must be set on to the roof base flashing.
 Install the bracket to the base flashing close to the counter flashing.
 Mark center of each hole and drill through the counter or base flashing.
 Bolt the bracket keep top of bracket level. See drawing to bolt bracket to Hatch counter flashing or base flashing.
 Bolt the posts into the brackets install the cross rails into the preset clamps and level adjust with wrench.
 Add chain or gate to post. Check and tighten all clamps and nuts.
