RAIN COLLAR GALVANIZED STEEL

Acudor Rain Collars are for use when additional space is necessary between pipe penetration and stack flashing and when venting is needed between pipe penetration and flashing.

- An economical rain collar made from 25 gauge galvanized metal (26 gauge for 2")
- 2" of overlap to allow for adjustment flexibility for various pipe sizes
- Available in sizes 4", 6", 8"
- Overlapping inner plate allows for adjustment up to +1" for larger pipe diameters
- One M6 x 45 galvanized steel bolt with nut
- Provides for silicon seal at upper edge where collar is tightened to pipe
