Introducing Albion's Multi-Component Dispenser for 750/750ml Cartridges.

The "B26™" Line competes with the best European and Asian imports and surpasses them with the integration of Albion's legendary quality and state-of-the-art engineering with the cost of an import!

Compare the "B26™" features with any other gun:

- **26:1 thrust ratio**— Makes dispensing the thickest material easier.
- **Longer dispensing tool life**— Albion's adjustment screw technology means increased

life of the gun—as the tool wears you can adjust the screw to eliminate wasted motion.

- **Increased durability**— Albion's legendary double gripping plates and steel trigger means increased durability; if it's dropped it won't break.

B26T1500X™ accepts 750/750ml (1:1) cartridges

- **More user friendly**— Albion's unique design holds the cartridge in place while dispensing and allows quick and easy cartridge removal.

- **Increased efficiency**— Albion's improved pump efficiency means you get the job done quicker. Designed so that it takes fewer pumps to empty a cartridge, you get more efficient use of hand motion.

Don't settle for anything less than the best. For more information, visit our website at www.albioneng.com. Our full line of products come with an Albion warranty and our commitment to professional quality tools.

Albion Engineering—

As a third generation American manufacturer recognized as a leader in the field of dispensing technologies, we design, develop and build High-End Dispensing Tools and Accessories for the most demanding professional and industrial applications.
