PRODUCT DATA BULLETIN

#724 FIBRATED LIQUID ROOF COATING - STANDARD

PURPOSE

Lucas #724 Fibrated Liquid Roof Coating provides an economical means of recoating and preserving smooth-surface asphalt roofs. Periodic recoating of otherwise sound built-up roofing felts can prolong service life many years. Deteriorated roofs can often be restored with the use of polyester fabric and select asphalt coatings

This product is not intended for use over tar or asphalt and gravel roofs. Please refer to our #010 for tar roofs and #713 for asphalt and gravel roofs.

PRODUCT DESCRIPTION

Lucas #724 is formulated from refined asphalt, reinforcing fibers and petroleum solvents. Consistency is maintained to provide easy brushing qualities with sufficient stability to avoid running or sagging when applied as directed. Application of #724 produces a soft, slow setting film which enhances the protective qualities of the product but prevents foot traffic for several weeks. If a faster setting product is desired, please refer to our #714 Fibrated Liquid Roof Coating—Premium. All Lucas asphalt roof coatings are ready to use and do not require special preparation before use

APPLICATION

Surface to be coated must be clean and dry. Weak, broken, cracked or blistered areas of the roof and flashings must be repaired prior to coating with #724. Blisters, which are caused by trapped moisture, must be opened and dried, then resealed using glass membrane and Lucas Flashing Cement. Moisture trapped between plies of a roof will eventually reappear as a blister or a leak. Apply #724 evenly, as it comes from the container with any appropriate tool, preferably, a four knot roofing brush, at the rate of approximately three gallons per 100 square feet. Do not allow foot traffic until the coating is fully cured. Clean up with mineral spirits or waterless hand cleaner.

CAUTION

Combustible mixture; keep away from heat and open flames. Avoid prolonged contact with skin or fumes. If irritation occurs seek medical attention. Do not use near heat or open flame. If swallowed, do not induce vomiting. Keep out of reach of children. Read MSDS prior to use.

California Proposition 65 Warning: This product may contain chemicals known to the State of California to cause cancer, birth defects and/or reproductive harm.

#724 SPECIFICATION

Applicable Specification	ASTM D 4479 Type I
Fed. Spec.	SS-A-694D
Viscosity ASTM D-2196	30000 cps
Recommended rate of application	3 gal. Per 100 sq. ft.
% Asphalt	68%.
% Solids	76%.
Weight per gallon	8 lbs.
Flash Point (TCC)	100°F + (38.7°C) Min.
VOC	250 g/l max.
Container Sizes	1, 5, 55, Bulk
