

Products and parts for deck construction

Technical spec. for **Adjustable Pylex 32"** No. article 10560

The simplest and most efficient way to support a patio, tool shed or deck without needing to dig or pour concrete. Quick installation with a lever. Adjust the head to facilitate installation or add an extension to insert it deeper.

Its steel structure, with a baked powder coating finish (anticorrosion) and its spiral disk ensure stability. This modern technology can be used in all types of terrain and resists ground movements (freezing, thawing).

Supports a load up to 5 000 lb in sandy soil - 3 500 lb in clay soil.

To be used with 3 ½ in x 3 ½ in square posts and with a Extension 24

Buried more than 42 in in the ground, below freezing depth. Height can be adjusted up to 3 in

Offers long term protection since the wooden post is above ground level
