NOTE: To comply with the ANSI & CSA Z-standards, we will be converting many of our ARS and RS Anchors from stainless steel to mild-steel with “Dacromat” finish.

Dacromat is stronger, more durable, longer lasting, anti-corrosive and passes all of the new testing criteria. We will not be increasing the cost of our anchors for this new feature.

**CRA Cast-Top**

Starting February 2015, we will be upgrading our CRA’s to a Cast-Loop top section. The cast top is stronger and will have a higher degree of tensile strength for our standard and window-washing anchors. These special tops will have our company initials (SAS) and the applicable Z359.1-09 standard cast into the loop. We will be phasing out our inventory of CRA’s and replacing them with the newer versions. We are not going to increase our cost on the CRA’s.
