SONOLASTIC® ULTRA
One-component, aliphatic, nonsag, elastomeric, polyurethane security sealant

Description
Ultra is a one-component, moisture-curing, aliphatic, nonsag, polyurethane sealant for security and institutional uses requiring elasticity and superior color integrity. Ultra is capable of withstanding ±25% movement in joints, yet has a high Shore A for security applications.

Packaging
300 ml (10.1 fl oz) cartridges, 30 per carton
20 U.S. fl oz (590 ml) ProPaks, 20 per carton

Color
White, limestone, and aluminum gray. Refer to the Sonneborn® Color Portfolio.

Where to Use
APPLICATION
• Expansion joints
• Curtain walls
• Panel walls
• Precast units
• Aluminum, vinyl, and wood window frames
• Prisons
• Schools
• Stadiums
• Parking decks
• Plazas
• Store fronts
• Wastewater treatment plants
• Dams
• Spillways and storm drains
• Wetwells and manholes

LOCATION
• Horizontal and vertical
• Interior and exterior
• Immersed in water

Features
• Aliphatic polyurethane technology
• Pick resistant
• High UV resistance
• No surface tackiness
• Medium modulus resistance
• Superior gunability and workability
• Movement capability ±25%
• Suitable for water immersion

Benefits
• Nonstaining, no yellowing, no chalking
• Excellent for security applications, schools, and other public buildings
• Experiences no discoloration from sunlight
• No dirt pick up, self-cleaning surface
• Provides superior puncture and abrasion
• Tools easily
• Expands and contracts with joint movement
• Documented performance in wet areas

Yield
See page 3 for charts.

Storage
Store in original, unopened containers away from heat and direct sunshine. Storing at elevated temperatures will reduce shelf life.

Shelf Life
Cartridges and ProPaks: 1 year when properly stored.

How to Apply
Joint Preparation
1. The number of joints and the joint width should be designed for a maximum of ±25% movement.
2. The depth of the sealant should be 1/2 the width of the joint. The maximum depth is 1/2" (13 mm) and the minimum is 1/4" (6 mm). Maximum recommended joint width is 1-1/2" (38 mm). Refer to Table 1.

Technical Data

Composition
Sonolastic® Ultra is a one-component, moisture-curing aliphatic polyurethane.

Compliances
- ASTM C 920, Type S, Grade NS, Class 25, Use NT, T, M, A, G, and I
- Federal Specification TT-S-00230C, Type II, Class A, when primed
- Corps of Engineers CRD-C-541, Type II, Class A
- USDA compliant for use in meat and poultry areas
- Canadian approval for use in areas that handle food
- SWRI validated

Adhesion in peel*, ppi
- Primed dry
  - Glass 37 CF**
  - Aluminum 34 CF**
  - Concrete 43 CF**

Water immersion, 122° F (50° C) | Passes 10 weeks with cycling | ASTM C 1247

* Primed for water immersion dictated by ASTM C 920. Concrete and aluminum primed with 733; glass primed with 766.
** Cohesive failure

Test results are averages obtained under laboratory conditions. Reasonable variations can be expected.

3. In deep joints, the sealant depth must be controlled by Closed-Cell Backer-Rod or Soft Backer-Rod. Where the joint depth does not permit the use of backer-rod, a bondbreaker (polyethylene strip) must be used to prevent three-sided adhesion.

4. To maintain the recommended sealant depth, install backer-rod by compressing and rolling it into the joint channel without stretching it lengthwise. Closed-Cell Backer-Rod should be about 1/8” (3 mm) larger in diameter than the width of the joint to allow for compression. Soft Backer-Rod should be approximately 25% larger in diameter than the joint width. The sealant does not adhere to it, and no separate bondbreaker is required. Do not prime or puncture the backer-rod.

Surface Preparation
Surfaces must be structurally sound, fully cured, dry, clean, free of dirt, moisture, loose particles, oil, grease, asphalt, tar, paint, wax, rust, waterproofing or curing and parting compounds, and membrane materials.

Concrete, Stone, and Other Masonry
Clean by grinding, sandblasting, or wire brushing to expose a sound surface free of contamination and laittance.

Wood
New and weathered wood must be clean and sound. Scrape away loose paint to bare wood. Any coating that cannot be removed must be tested to verify adhesion of sealant or to determine an appropriate primer.

Metal
Remove scale, rust, and coatings from metal to expose a bright white surface. Remove protective coatings as well as any chemical residue or film. Aluminum window frames are frequently coated with a clear lacquer that must be removed before the application of Ultra. Any coating that cannot be removed must be tested to verify adhesion of sealant or to determine an appropriate primer. Remove any other protective coatings or finishes that could interfere with adhesion.
Priming
1. Special circumstances or substrates may require a primer. It is the user’s responsibility to check the adhesion of the cured sealant on typical test joints at the project site before and during application. Refer to product data sheet on Primer 733 or 766 (Form No. 1017962) and consult Technical Service for additional information.
2. For immersion applications, Primer 733 must be used.
3. Apply primer full strength with a brush or clean cloth. A light, uniform coating is sufficient for most surfaces. Porous surfaces require more primer; however, do not overapply.
4. Allow primer to dry before applying Ultra. Depending on temperature and humidity, primer will be tack free in 15 – 120 minutes. Priming and sealing must be done on the same work day.

Application
1. Ultra comes ready to use. Apply by professional caulking gun. Do not open cartridges or sausages until preparatory work has been completed. In cool or cold weather, store at room temperature for at least 24 hours before using.
2. Fill joints from the deepest point to the surface by holding a properly sized nozzle against the back of the joint.
3. Dry tooling is recommended. DO NOT use soapy water or solvents when tooling. Tooling results in the correct bead shape, a neat joint, and maximum adhesion.

Clean Up
1. Immediately after use, clean equipment with Reducer 990 or xylene. Use proper precautions when handling solvents.
2. Remove cured sealant by cutting with a sharp-edged tool.
3. Remove thin films by abrading.

Curing Time
The cure of Ultra varies with temperature and humidity. The following times assume 75°F (24°C), 50% relative humidity, and a joint 1/2” width by 1/4” depth (13 by 6 mm).

Skins: overnight or within 24 hours
Functional: within 3 days
Full cure: approximately 1 week
Immersion service: 21 days

For Best Performance
• Do not allow uncured Ultra to come into contact with alcohol-based materials or solvents.
• Do not apply polyurethane sealants in the vicinity of uncured silicone sealants or uncured Sonolastic® 150 or 150 Tint Base.
• Ultra should not come in contact with oil-based caulking, silicone sealants, polysulfides, or fillers impregnated with oil, asphalt, or tar.
• All horizontal applications require the use of Primer 733.
• Protect unopened containers from heat and direct sunshine.
• In cool or cold weather, store container at room temperature for at least 24 hours before using.
• When Ultra is to be used in areas subject to water immersion, cure for 21 days at 70°F (25°C) and 50% relative humidity. Allow longer cure time at lower temperatures and humidity.
• Do not use in swimming pools or other submerged conditions where the sealant will be exposed to strong oxidizers. Avoid submerged conditions where water temperatures will exceed 120°F (50°C).
• Lower temperatures will extend curing times.
• Do not apply over freshly treated wood; treated wood must have weathered for at least 6 months.

• Substrates such as copper, stainless, and galvanized typically require the use of a primer; Primer 733 or 766 is acceptable. For Kynar coating use Primer 733 only. An adhesion test is recommended for any other questionable substrate.

• Ultra can be applied below freezing temperatures only if substrates are completely dry, free of moisture, and clean. Contact Technical Service for more information.

• Do not use as a cap, heel, or toe bead for exterior glazing. Refer to the Sonolastic® 150 product data sheet (Form No. 1026309).

• Make certain the most current version of this data guide is being used; call Customer Service (1-800-433-9517) to verify the most current version.

• Proper application is the responsibility of the user. Field visits by BASF personnel are for the purpose of making technical recommendations only and not for supervising or providing quality control on the job site. 

Health and Safety

ULTRA

Warning

Ultra contains Stoddard solvent, methylene bis (4-cyclohexylisocyanate) and crystalline quartz silica. 

Risks

May cause skin, eye and respiratory irritation. May cause dermatitis and allergic responses. Potential skin and/or respiratory sensitizer. Ingestion may cause irritation. Reports associate repeated or prolonged occupational overexposure to solvents with permanent brain, nervous system, liver and kidney damage. INTENTIONAL MISUSE BY DELIBERATELY INHALING THE CONTENTS MAY BE HARMFUL OR FATAL. 

Precautions

KEEP OUT OF THE REACH OF CHILDREN. Use only with adequate ventilation. Keep container closed. Prevent contact with skin, eyes and clothing. Wash thoroughly after handling. Use impervious gloves, eye protection and the TLV is exceeded or used in a poorly ventilated area, use NIOSH/MSHA approved respiratory protection in accordance with applicable federal, state and local regulations. All warnings must be observed until container is commercially cleaned or reconditioned.

First Aid

In case of eye contact, flush thoroughly with water for at least 15 minutes. SEEK IMMEDIATE MEDICAL ATTENTION. In case of skin contact, wash affected areas with soap and water. If irritation persists, SEEK MEDICAL ATTENTION. Remove and wash contaminated clothing. If inhalation causes physical discomfort, remove to fresh air. If discomfort persists or any breathing difficulty occurs, or if swallowed, SEEK IMMEDIATE MEDICAL ATTENTION.

Refer to Material Safety Data Sheet (MSDS) for further information. 

Proposition 65

This product contains materials which are listed by the state of California as known to cause cancer, birth defects, or other reproductive harm. 

VOC Content

118 g/L or 099 lbs/gal, less water and exempt solvents. 

For medical emergencies only, call ChemTrec (1-800-424-9300). 

LIMITED WARRANTY NOTICE. Every reasonable effort is made to apply BASF exacting standards both in the manufacture of our products and in the information which we issue concerning these products and their use. We warrant our products to be of good quality and will replace or, at our election, refund the purchase price of any products proved defective. Satisfactory results depend not only upon quality products, but also upon many factors beyond our control. Therefore, except for such replacement or refund, BASF MAKES NO WARRANTY OR GUARANTEE, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE OR MERCHANTABILITY, RESPECTING ITS PRODUCTS, and BASF shall have no other liability with respect thereto. Any claim regarding product defect must be received in writing within one (1) year from the date of shipment. No claim will be considered without such written notice or after the specified time interval. User shall determine the suitability of the products for the intended use and assumes all risks and liability in connection therewith. Any authorized change in the printed recommendations concerning the use of our products must bear the signature of the BASF Technical Manager.

This information and all further technical advice are based on BASF’s present knowledge and experience. However, BASF assumes no liability for providing such information and advice including the extent to which such information and advice may relate to third party intellectual property rights, especially patent rights.
